

# SECURITY POINTS

## ES&S & SECURITY

At ES&S we design, build and sell voting systems that support all the ways people vote across our nation. The overriding design philosophy with all of our products is to ensure accuracy, security and reliability — a philosophy that has prevailed throughout our company's history.

Our mission at ES&S is simple and unwavering. We believe in "maintaining voter confidence and enhancing the voting experience". We deliver on this commitment through our dedication to the research, design and manufacture of secure, accurate and reliable voting systems.

In addition, we remain committed to submitting all of our systems to the EAC federal testing process that is the gold standard for our industry. Finally, our promise of accuracy, security and reliability is supported and strengthened by the dedication and attention to excellence that is a hallmark of the thousands of election officials across the nation whom we serve. We support each of these officials in our mutual quest to perpetually uphold the integrity of this nation's elections process.

## CERTIFICATION

ES&S submits our tabulation systems to rigorous and lengthy test campaigns as part of the Election Assistance Commission's (EAC) Voting System Certification Program. This important program sets forth security and performance standards that were developed by scientists, academicians and election officials. All of our systems are tested by independent laboratories that have received federal accreditation.

In addition to adhering to the security and performance requirements of the EAC Certification Program, our systems allow election officials to easily adhere to the laws of their state which mandates strict physical security and tight chain of custody of the voting machines.
